

## Portugal offers affordable European residency to international investors

April 11, 2020

New Delhi (NVI): International investors can now get European residency in an easier and cost-effective manner by opting for Portugal Golden Visa programme.

Through this programme, an international investor can get the residency in 12 months and at the same time, access to professional development, education for children, and the potential for a European passport in 5 years.

This means, that non-EU nationals can now live, work or study in any of the EU countries at an affordable rate through the Golden route offered by Portugal, a core member of the European Union.

LCR Capital Partners, a global private investment and advisory services firm, is now helping its clients obtain the Portuguese ("Autorização de Residência para Actividade de Investimento") which is commonly referred to as the Portuguese Golden Visa.

This is a new service for international investors and their families interested in European residency.

The Portuguese Golden Visa is an investment-based visa designed to attract foreign capital. Unlike the US EB-5 Program, the Portugal Golden Visa program is based on personal property ownership and is a lower cost and quicker alternative for families that don't have access to US markets and schools.
